

## **World Congress and Exhibition - ENGINEERING 2010- ARGENTINA announces that the deadline for the submission of abstracts has been extended until April 1st, 2010**

(Buenos Aires, February 2010) **ENGINEERING 2010-ARGENTINA, World Congress and Exhibition**, which will take place in our country on October 17-20, 2010, at La Rural Exhibition Center, with the core topic “*Technology, Innovation and Production for Sustainable Development*”, **informs that the deadline for the submission of abstracts has been extended until April 1<sup>st</sup>, 2010.**

All engineers, professionals and entrepreneurs of the sector are invited to send their papers to share their researches, experiences and knowledge, visiting the Congress Website: [www.ingenieria2010.com.ar](http://www.ingenieria2010.com.ar) (CALL FOR PAPERS).

**Download document with general conditions for papers submission at the following link::**

[http://www.ingenieria2010.com.ar/files/SECOND\\_ANNOUNCEMENT\\_ENGINEERING\\_2010\\_English\\_version.pdf](http://www.ingenieria2010.com.ar/files/SECOND_ANNOUNCEMENT_ENGINEERING_2010_English_version.pdf)

**ENGINEERING 2010-ARGENTINA, World Congress and Exhibition**, will be an excellent opportunity to communicate globally the advances in technology, innovation and production; to promote the interaction among engineers and to encourage their contribution to society and the social commitment of their enterprises.

Papers will be assessed by distinguished engineering professionals, the academy and the productive sector. The Congress will offer the opportunity to share contributions with colleagues from abroad, in order to enrich the discussion and analyze the advances in engineering and the different problems to which it can provide a substantial contribution.

During **ENGINEERING 2010-ARGENTINA**, professionals of the sector will be able to discuss and analyze how to carry out their activities in favor of sustainable development, offering an important contribution to the growth of industry.

The topics to be dealt with during the Congress will be developed separately and will be coordinated by the presidents of the organizing Committees, well-known engineering professionals of Argentina, with a wide experience in each subject. The list of topics will focus on the discussion of current issues that will lead to specific, practical and internationally applicable conclusions, which in turn will be presented in a plenary meeting at the end of the Congress. Then, they will be submitted to the consideration of governments.

UADI (Argentine Union of Engineering Associations) and CAI (Argentine Center of Engineers) are organizing the World Congress and Exhibition: “**ENGINEERING 2010-ARGENTINA: Technology, Innovation and Production for Sustainable Development**”, under the sponsorship of WFEO, UPADI, UNESCO, ISTIC, the

Government of Argentina and many other engineering institutions, associations of productive sectors, and governmental agencies.

The shared approach given by the core topic of the **World Congress and Exhibition: ENGINEERING 2010-ARGENTINA**, will be analyzed in 6 parallel chapters and 2 forums:

**Chapters:**

1. Information Technologies and Communications - ITCs
2. Energy and Climate Change - ECC
3. Innovation in Primary Production and Agro-Alimentary Industries - IPPAI
4. Large Metropolises and their Infrastructure - LMI
5. Engineering Education for Sustainable Development - EESD
6. Engineering Professional Practice - EPP

**Forums**

7. Women in Engineering and Business - WEB
8. Young People in Engineering and Business - YPEB

The Exhibition will take place within the development of the Congress and considering the key themes that will be discussed there. The most representative firms of the sectors of infrastructure, energy, food, and telecommunications, among others, are already participating in it as well as their suppliers, thus turning the Congress into an essential meeting and business point for their main referents.
